One Motivation

*“We stress that conservation of the environment is not, and must not be seen as, a matter only for government or officials. **It is something that concerns us all.** This is a responsibility for all, for every member of our society, both nationals and other residents.”*

- Zayed bin Sultan Al Nahyan, founding father of the United Arab Emirates

Citizen Science Global Partnership announced

Johannes Vogel announcing CSGP at UNEA 3

“Professional science alone cannot provide information at the scales and resolutions necessary to understand environmental change. The dominant culture of science rarely accounts for different ways of knowing, and often fails to engage the public.”

African Association – Seeds planted at USIU Nairobi

Citizen science (CS) emphasizes collaborative intelligence and co-creation to facilitate scientific and community-based solutions. But fully realizing the transformative potential of CS requires coordination, partnership, and mobilization across geographies, sectors, and research domains.”
